Autumn Care is one step closer to developing a new facility in Mocksville

Mocksville, NC – April 1, 2010 – Autumn Care is one step closer to developing a new 57,000 square foot, 108 bed state of the art skilled-nursing home in Mocksville. Autumn Corporation closed on a 40 acre tract of land located on Madison Road in Mocksville, NC which will be the future site of their new state of the art facility. The \$9.7 million dollar investment will be used to replace the current Autumn Care facility located on Howard Street in Mocksville. The current facility was built in several phases beginning in the 1960's and continuing through the early 1990's.

Autumn Corporation, based in Rocky Mount, NC originally considered a renovation plan that would have replaced or upgraded the existing facility one wing at a time. In the end they determined that a new modern facility would allow them to better meet the current and future needs of the community and Autumn Care's patients and employees.

The Autumn Corporation, started in 1979 owns and operates 23 facilities in North Carolina and Virginia. More information is available at www.autumncorp.com or www.daviecountyedc.com.
